Thursday 13th June 2019

International Macroeconomic Outlook

Global Construction (macro-trends, scenarios and forecast)

European construction outlook

European market by region & sector to 2021

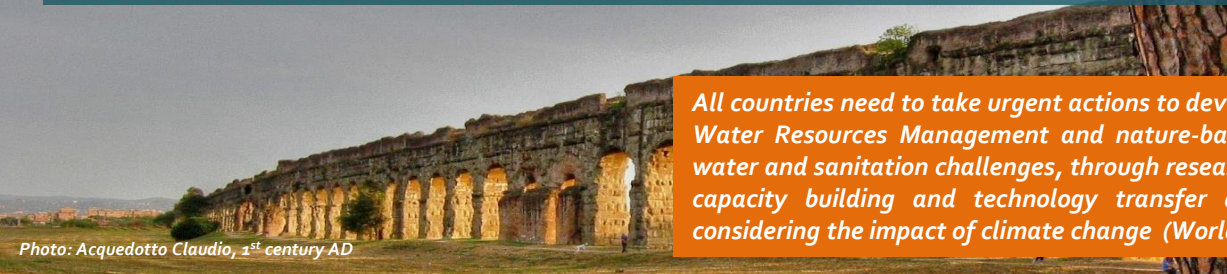

Special topic: water and environmental resilience

Rome 12th & 13th June 2019

Special Topic

Water and environmental resilience

All countries need to take urgent actions to develop and share solutions including Integrated Water Resources Management and nature-based solutions to address the most pressing water and sanitation challenges, through research and innovation, upscaling cooperation on capacity building and technology transfer and other means of implementation and considering the impact of climate change (World Water Forum, March 2018)
